# HSPS120LT

1 Zone, Low Temp Panel  
120K BTU

The HSPS120LT is a one zone, low temperature integrator panel for radiant heat. This panel is designed for Tubing in Concrete emitters such as Embedded Concrete or Staple Down/Pour Over. It features Primary/Secondary plumbing, expansion tank, clear y-strainer, supply and return pressure/temperature gauges, and other components necessary to ensure your system runs smoothly.

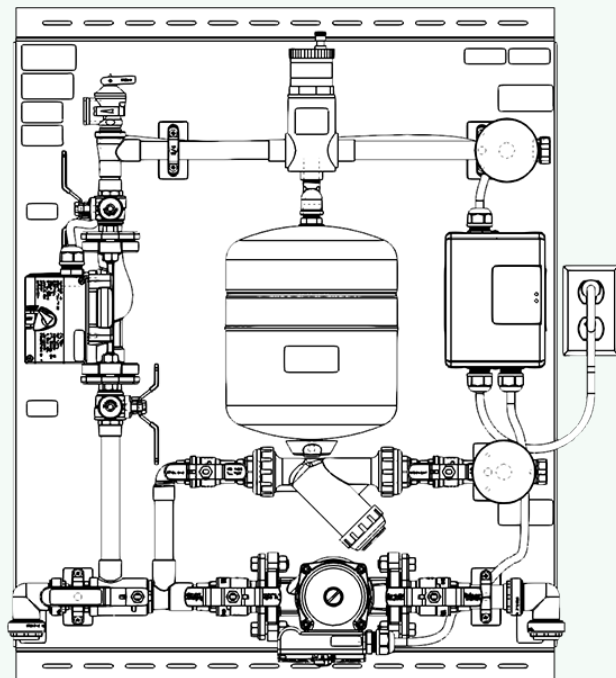

## Compatible Boilers

- HydroShark
- Thermo 2000
- HS115
- HS120Con

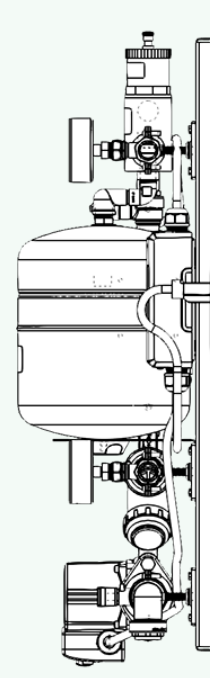

## Compatible Emitters

- Embedded Concrete
- Staple Down/Pour Over

32.50"

# Dimensions & Specs

|                                |                           |
|--------------------------------|---------------------------|
| Supply From Boiler Connection  | 3/4"                      |
| Return To Boiler Connection    | 3/4"                      |
| Master Supply Connection       | 1"                        |
| Master Return Connection       | 1"                        |
| Max Water Temperature          | 155°F                     |
| Max BTU                        | 120,000                   |
| Number of Zones                | 1                         |
| Emitter Type                   | <i>Tubing In Concrete</i> |
| Square Footage                 | <i>Up to 3500</i>         |
| Zone Panel Required            | No                        |
| Number of Thermostats Required | 1                         |

This system view features the HSPS120LT one zone integrator panel, HS120CON gas boiler and a 3POS manifold. Your system may have a different boiler and number of loops from what is shown. This is to illustrate what a typical system would look like when completed.
